Continuation of 3. NOTE: The Applicant has failed to amend the claims to overcome the prior art rejections, the rejections under 35 USC 112, 1st and 2nd paragraphs, and double patenting. Applicant arguments are similar to those set forth in the previous response, and therefore the Examiner retains the response to those arguments set forth in the previous office action. Applicant states that the Examiner "disregarded" previous comments, however, this is not the case. The Applicant's arguments were fully considered, but were not found persuasive. Applicant argues that a multi-component wheel cannot be a "substantially unitary" wheel. However, the term "substantially" means "being largely but not wholly that which is specified". Therefore, Jurus meets this definition of a "substantially unitary" wheel, given the fact that a large portion of the wheel of Jurus is a single element. Applicant has failed to provide any special or specific definition to the term "substantially" to preclude the wheel of Jurus.
